

CONTENTS OF VOLUME 266

Number 1, August 1, 2003

The uniform word problem for groups and finite Rees quotients of E-unitary inverse semigroups	1
Benjamin Steinberg	
Metric invariants over Henselian valued fields	14
Angel Popescu, Nicolae Popescu, and Alexandru Zaharescu	
Tame A_n-extensions of \mathbb{Q}	27
Bernat Plans and Núria Vila	
Hyperbolic modules and cyclic subgroups	34
Maria Loukaki	
Connectedness of degree graphs of nonsolvable groups	51
Mark L. Lewis and Donald L. White	
Weak projectives of finite semigroups	77
Yevhen Zelenyuk	
Orthogonal groups containing a given maximal torus	87
Rosali Brusamarello, Pascale Chuard-Koulmann, and Jorge Morales	
The Dade group of a metacyclic p-group	102
Nadia Mazza	
Conjugacy problem for braid groups and Garside groups	112
Nuno Franco and Juan González-Meneses	
Commuting involution graphs for symmetric groups	133
C. Bates, D. Bundy, S. Perkins, and P. Rowley	
Approximation by smooth curves near the tangent cone	154
Anvar R. Mavlyutov	
A generalization of Brauer's theorem on splitting fields to semigroups	162
Janez Bernik	
The Poincaré series of the algebra of rational functions which are regular outside hyperplanes	169
Hiroki Horiuchi and Hiroaki Terao	
Invariant constituents and invariant blocks under coprime action	180
Ziqun Lu	
Constructive techniques for labeling constant weight Gray codes with applications to minimal generating sets of semigroups	189
Inessa Levi and Steve Seif	
Counting techniques to label constant weight Gray codes with links to minimal generating sets of semigroups	220
Inessa Levi and Steve Seif	
Ring-theoretic properties of commutative algebras of invariants	239
Issai Kantor and Louis H. Rowen	

Descent theory and Amitsur cohomology of triples	261
Claudia Menini and Dragoş Ştefan	
Products of characters and derived length	305
Edith Adan-Bante	
Maximal complements in wreath products	320
Christopher Parker and Martyn Quick	
Anneau de Witt des G-formes et produit des G-formes traces par des formes quadratiques	338
Philippe Chabloy	
Two-dimensional vector invariant rings of Abelian p-groups	362
Jianjun Chuai	

Number 2, August 15, 2003

An identification theorem for groups of finite Morley rank and even type	375
Ayşe Berkman and Alexandre V. Borovik	
Finite generation and presentability of wreath products of monoids	382
E.F. Robertson, N. Ruškuc, and M.R. Thomson	
Agreeable semigroups	393
Marcel Jackson and T. Stokes	
Descente algébriquement close	418
Geoffroy Derome	
Brauer trees for the Schur cover of the symmetric group	427
Jürgen Müller	
Finite orthodox locally idempotent semigroups having no finite basis of biidentities	446
Jiří Kad'ourek	
A taxonomy of 2-primal rings	494
Greg Marks	
Multiplicity of the trivial representation in rank-selected homology of the partition lattice	521
Phil Hanlon and Patricia Hersh	
Groups of prime-power order with a small second derived quotient	539
Csaba Schneider	
Integrals for (dual) quasi-Hopf algebras. Applications	552
D. Bulacu and S. Caenepeel	
The blob algebra in positive characteristic	584
Anton Cox, John Graham, and Paul Martin	
Homogeneous coordinates for algebraic varieties	636
Florian Berchtold and Jürgen Hausen	
Approximations with modules having linear resolutions	671
Roberto Martínez-Villa and Dan Zacharia	

Lie algebras with triality	698
Alexander Grishkov	
Derived categories, tilted algebras, and Drinfel'd doubles	723
Liangang Peng and Youjun Tan	
Finite-dimensional representations of invariant differential operators, II	749
Gerald W. Schwarz	
<i>Author index for volume 266</i>	756
